

# Create Service Credential

1. To create the connection information that your application needs to connect to the instance, click New credential.

2. Enter a name for the new credential in the Add new credential window.
3. Accept the Manager role.
4. (Optional) Create a service ID or have one automatically generated for you.
5. (Optional) Add inline configuration parameters. This parameter isn't used by IBM Cloudant service credentials, so ignore it.
6. Click Add.

7. To see the credentials that are required to access the service, click the chevron.

Manage Service credentials

You can generate a new set of credentials for cases where you want to manually connect an app or external consumer to an IBM Cloud service. [Learn more](#)
